## **SOURCE DOCUMENT ADVISORY**

---

Digital images were created from printed source documents that, in many cases, were photocopies of original materials held elsewhere. The quality of these copies was often poor. Digital images reflect the poor quality of the source documents.

Where possible images have been manipulated to make them as readable as possible. In many cases such manipulation was not possible. Where available, the originals photocopied for publication have been digitized and have been added, separately, to this collection.

Searchable text generated from the digital images, subsequently, is also poor. The researcher is advised not to rely solely upon text-search in this collection.
